## Proposal Text

### ***Add Collateral Factors for MKR, SUSHI, AAVE, YFI, & LINK***

Compound Proposal 53, 54, & 46 added MKR, SUSHI, AAVE, YFI, & LINK to the protocol with a collateral factor of 0. Now that each market has been safely added to the protocol, it is time to set initial collateral factors. Each of the collateral factors chosen is conservative and can likely be updated in 2-3 months once the markets stabilize.
