## Proposal Text

### OpenZeppelin Security Partnership - 2022 Q2 Adjustment V4

#### Background

There were [timing issues](#) with the Sablier stream creation in past canceled proposals. In this proposal, we've removed Sablier and will continue with the existing streaming function. More information on the timing issue is available [here](#).

Starting on Dec 21st, 2021, OpenZeppelin was [selected](#) to offer the Compound DAO security services including continuous audit, security advisory, and monitoring.

OpenZeppelin has finished auditing the Compound Deployed Contracts and finalized the CToken Refactor audit ([details here](#)). On the Security Advisory services, OpenZeppelin has been focusing on improving [the security of the Proposal Process](#) and Asset Listings. Finally, on Security Monitoring, OpenZeppelin is aiming to release an initial solution by the end of March.

As outlined in the original proposal, at the start of every quarter OpenZeppelin will create a proposal to update the service fee payment in accordance with the formula outlined in the [proposal](#). As it is the beginning of a new quarter, OpenZeppelin is updating its existing streaming grant.

More detail in this [forum post](#)
