Proposal Text

Pause Supply for Compound Assets

Simple Summary

A proposal to pause supply for ZRX, BAT, MKR, and YFI on Compound III.

Background

Details are provided in the governance [forum post](#).

Motivation

An oracle manipulation-based attack analogous to the one that cost Mango Markets \$117m is much less likely to occur on Compound due to collateral assets having much deeper liquidity than MNGO and Compound requiring loans to be over-collateralized. However, out of an abundance of caution, we propose pausing supply for the above assets, given their relative liquidity profiles.

Importantly, this will be a step towards incentivizing migration from Compound V2 to Compound V3, which the community has voiced support for. Compound V3 has meaningfully more risk controls, including supply caps.

Specification

- Pauses supplying on cZRX, cBAT, cMKR, and cYFI by calling `_setMintPaused` on the Comptroller contract
