### [Gauntlet] 2024-01-29: Compound v2 Deprecation (Phase 8)

#### Simple Summary

A proposal from Gauntlet to adjust 8 Compound v2 risk parameters for Phase 8 of the Compound v2 Deprecation.

Gauntlet recommends the following changes:

- Decrease **cAAVE Collateral Factor** from 48% to **43%**
- Decrease **cBAT Collateral Factor** from 55% to **50%**
- Decrease **cCOMP Collateral Factor** from 35% to **30%**
- Decrease **cLINK Collateral Factor** from 54% to **49%**
- Decrease **cMKR Collateral Factor** from 48% to **43%**
- Decrease **cSUSHI Collateral Factor** from 42% to **37%**
- Decrease **cYFI Collateral Factor** from 50% to **45%**

- Decrease **cZRX Collateral Factor** from 40% to **35%**

For more details, see the full forum post [here](#).

## Motivation

In this [September 2022 snapshot vote](#), the community voted that each asset's Collateral Factor may be reduced by an absolute percentage of up to 5%. After our analysis, Gauntlet recommends this max 5% decrease for each stated collateral asset in order to further deprecate the v2 market.
