Proposal Text

Set Pause Guardian to Community Multi-Sig

The [Pause Guardian](#) is emergency functionality used to pause supply, borrowing, or liquidation in a market.

This proposal transfers guardianship from Compound Labs (which has always held this role) to Community Multi-Sig created by members of the community: [0xbbf3f1421D886E9b2c5D716B5192aC998af2012c](#).

The Multi-Sig requires 4-of-6 signers to approve any transaction. The signer addresses can be seen [here on Gnosis Safe](#), and currently include @TennisBowling, @arr00, @blck, Compound Labs, Dharma Labs (@0age), and @jared. For full context and history on the Multi-Sig, please see [this post](#) on the Compound Community Forum.

Setting the Pause Guardian address to the Community Multi-Sig will further decentralize and ensure the security of the Compound Protocol.
